DETAILED ACTION

1. This is in response to the applicant's communication filed on February 1, 2007, wherein:

Claims 1-14 are currently pending;

Claims 1 and 10 have been amended.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has amended independent claims 1 and 10 to incorporate the following limitation:

wherein the at least one experience designator represents a type of user experience associated with a particular lodging option base upon its setting

What exactly is the user trying to claim. A type of experience based upon its setting. What does applicant mean? What defines a type of experience? How can a type of experience be based upon a setting.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3629

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clough et al (2003/0088445) (hereinafter referred to as Clough) in view of Patullo et al (US 2005/0033613) (hereinafter referred to as Patullo)

Clough discloses a method and system for locating/facilities lodging options stored in a database, including/comprising;

- a database, an input, a generating and displaying means (Figure 1);
- inputting type of experience associated with a lodging option (Figure 2 (204));
- searching a database of lodging options which include the input experience (Figure 2 (206, 208)); and
- displaying a list of lodging options retrieved from the search;
- selecting a lodging option from the display list (Figure 2);
- making a reservation (Figure 2 (214)).

Clough discloses a user providing various information regarding a desired facility location and features [0026]. Clough does not disclose displaying additional information regarding the selected option or an experience designator based on setting.

However, Patullo discloses displaying additional information regarding the selected option (Figure 5 View-Video of this Resort [0032]) and experience designator based on setting (Figure 5 (one bedroom Beachfront, oceanview, gardenview) and Figure 8A-8B).

It would have been obvious to one of ordinary skill in the art to incorporate into the reservation method and system disclosed in Clough the additional information taught in Patullo to aid the user in making a choice.

Response to Arguments

4. Applicant's arguments filed February 2, 2007 have been fully considered but they are not persuasive.

As for applicant's arguments as to claims 1-9, claim 1 is directed to a system. Thus, the type data being stored in the database is given little patentable weight if the system in the prior art is fully capable of storing the data. As claimed, the type of experience for each lodging is not functionally related to the structure of the system.

Furthermore, Clough discloses in paragraph [0026] that the user provides various information regarding a desired facility location feature. A view of what applicant identifies as Experiences in Figure 4, would be a desired facility location. The Examiner asserts that Clough in combination with Patullo discloses the claim limitation.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
